

## EDITORIAL

- Cardiac protection takes off**  
*H.M. Piper and D. Garcia-Dorado* 163

## VIEWPOINT EDITORIAL

- Lethal reperfusion injury in acute myocardial infarction: facts and unresolved issues**  
*D. Garcia-Dorado, M. Ruiz-Meana, and H.M. Piper* 165

## REVIEWS

- Orphan targets for reperfusion injury**  
*J. Inserte, J.A. Barrabés, V. Hernando, and D. Garcia-Dorado* 169
- Cardioprotective growth factors**  
*D.J. Hausenloy and D.M. Yellon* 179
- Myocardial protection by nitrite**  
*J.W. Calvert and D.J. Lefer* 195
- Phosphodiesterase 5 inhibitors: are they cardioprotective?**  
*T. Reffelmann and R.A. Kloner* 204
- Regulation and pharmacology of the mitochondrial permeability transition pore**  
*D.B. Zorov, M. Juhaszova, Y. Yaniv, H.B. Nuss, S. Wang, and S.J. Sollott* 213
- Inhibition of mitochondrial permeability transition pore opening: translation to patients**  
*L. Gomez, B. Li, N. Mewton, I. Sanchez, C. Piot, M. Elbaz, and M. Ovize* 226
- Protective ischaemia in patients: preconditioning and postconditioning**  
*A. Granfeldt, D.J. Lefer, and J. Vinten-Johansen* 234
- Loss of cardioprotection with ageing**  
*K. Boengler, R. Schulz, and G. Heusch* 247
- The use of controlled reperfusion strategies in cardiac surgery to minimize ischaemia/reperfusion damage**  
*F. Beyersdorf* 262
- Benefits of reperfusion beyond infarct size limitation**  
*G. Takemura, M. Nakagawa, H. Kanamori, S. Minatoguchi, and H. Fujiwara* 269

## ORIGINAL ARTICLES

- Pharmacological postconditioning effect of muramyl dipeptide is mediated through RIP2 and TAK1**  
*P. Sicard, S. Jacquet, K.S. Kobayashi, R.A. Flavell, and M.S. Marber* 277
- Protective effects of sphingosine-1-phosphate receptor agonist treatment after myocardial ischaemia–reperfusion**  
*U. Hofmann, N. Burkard, C. Vogt, A. Thoma, S. Frantz, G. Ertl, O. Ritter, and A. Bonz* 285
- High glucose sensitizes adult cardiomyocytes to ischaemia/reperfusion injury through nitrative thioredoxin inactivation**  
*R. Luan, S. Liu, T. Yin, W.B. Lau, Q. Wang, W. Guo, H. Wang, and L. Tao* 294
- Growth hormone-releasing hormone promotes survival of cardiac myocytes *in vitro* and protects against ischaemia–reperfusion injury in rat heart**  
*R. Granata, L. Trovato, M.P. Gallo, S. Destefanis, F. Settanni, F. Scarlatti, A. Brero, R. Ramella, M. Volante, J. Isgaard, R. Levi, M. Papotti, G. Alloatti, and E. Ghigo* 303
- Leptin attenuates cardiac apoptosis after chronic ischaemic injury**  
*K.R. McGaffin, B. Zou, C.F. McTiernan, and C.P. O'Donnell* 313
- Parstatin: a cryptic peptide involved in cardioprotection after ischaemia and reperfusion injury**  
*J.L. Strande, M.E. Widlansky, N.E. Tsopanoglou, J. Su, J. Wang, A. Hsu, K.V. Routhu, and J.E. Baker* 325

<b>The targeting of cyclophilin D by RNAi as a novel cardioprotective therapy: evidence from two-photon imaging</b>	
<i>M. Kato, M. Akao, M. Matsumoto-Ida, T. Makiyama, M. Iguchi, T. Takeda, S. Shimizu, and T. Kita</i>	335
<b>Rapid cooling preserves the ischaemic myocardium against mitochondrial damage and left ventricular dysfunction</b>
