Cardiovascular Research is a journal concerned with the link between the basic sciences, clinical physiology and clinical cardiology. Thus its purpose is to provide a forum for those engaged in the application of methods of the basic sciences to the understanding of clinical disease.

Submission of a paper will be held to imply that it contains original work which has not been published before and is not being submitted for publication elsewhere. Permission to reproduce in whole or in part must be obtained from the publisher.

Instructions to authors
Instructions to authors are printed on the inside rear cover of each issue.

Book Reviews
Review copies of books may be sent to Dr M J Curtis (Book Review Editor), Associate Editor, Cardiovascular Research, Pharmacology Group, King's College, London SW3 6LX.

Proofs
Proofs will be sent to the author. A charge may be made for corrections other than printer's errors.

Reprints
Reprints are available on payment of the necessary costs if they are ordered when the proof is returned.

Notice to advertisers
Applications for advertisement space and rates should be made to the Advertisement Manager, Cardiovascular Research. BMJ House, Tavistock Square, London WC1H 9JR.

SPOTLIGHT ON
EXCITATION-CONTRACTION COUPLING
IN THE
MAMMALIAN MYOCARDIUM

Guest Editors:

James G McCormack
Department of Pharmacology
Syntex Research Centre
Heriot-Watt University Research Park
Riccarton
Edinburgh EH14 4AP

Mark R Boyett and Clive H Orchard
Department of Physiology
University of Leeds
Leeds LS2 9JT

The publication costs of this Special Issue were supported in part by grants from the British Heart Foundation, the British Society for Cardiovascular Research, and Pfizer Central Research.
### Spotlight on Excitation-Contraction Coupling in the Myocardium

**Overview by the Guest Editors**

Mark Boyett, James McCormack, Clive Orchard

---

#### Leading Articles

**Masterclass articles**

1701 Reconstructing the heart: a challenge for integrative physiology  
Denis Noble, Glenna Bett

1713 Electrophysiology of human cardiac cells  
Edouard Coraboeuf, Joël Nargeot

**Short reviews**

1726 Sodium/calcium exchanger in heart muscle: molecular biology, cellular function, and its special role in excitation-contraction coupling  
Dan Schultz, Paulo Kofuji, Robert Hadley, Mark S Kirby, Robert S Kieval, Andrea Doering, Ernst Niggli, W J Lederer

1735 Modulation of cardiac contractility by α₁ adrenoceptors  
David Fedida

---

#### Viewpoints

**Perspectives on excitation-contraction coupling**

1743 One hump or two? The triggering of calcium release from the sarcoplasmic reticulum and the voltage dependence of contraction in mammalian cardiac muscle  
Allan J Levi, Paul Brooksby, Jules C Hancox

1758 Mechanisms of excitation-contraction coupling studied using the principle of transient perturbation  
M M Nobel, P Arlock, J Gath, N Grainger, U Ravens, B Wohlfart

1766 Control of the calcium pump of cardiac sarcoplasmic reticulum. A specific role for the pentameric structure of phospholamban?  
John Colyer

1772 Competition and redistribution among calcium transport systems in rabbit cardiac myocytes  
Donald M Bers, José W M Bassani, Rosana A Bassani

1778 Calcium and the oxygen paradox  
Berthold Siegmund, Klaus-Dieter Schlüter, Hans M Piper

1784 Arrhythmogenicity of the hypertrophied and senescent heart and relationship to membrane proteins involved in the altered calcium handling  
F Carré, F Rannou, C Sainte Beuve, B Chevalier, J M Moalic, B Swynghedauw, D Charlemagne

1790 On the involvement of a cyclosporin A sensitive mitochondrial pore in myocardial reperfusion injury  
Michael R Duchen, Orla McGuinness, Leslie A Brown, Martin Crompton

---

#### Original Articles

1795 Heterogeneity of action potential waveforms and potassium currents in rat ventricle  
R B Clark, R A Bouchard, E Salinas-Stefanon, J Sanchez-Chapula, W R Giles

1800 Changes in mitochondrial calcium concentration during the contraction cycle  
Gerrit Isenberg, Song Han, Alfred Schiefer, Maria-Fiora Wendt-Gallitelli

1810 Changes in the principal free intracellular amino acids in the Langendorff perfused guinea pig heart during arrest with calcium-free or high potassium media  
M-S Suleiman, R A Chapman

1815 Ryanodine sensitive calcium release channel from left ventricle, septum, and atrium of canine heart  
Le Xu, Anita H Cohn, Gerhard Meissner

1820 Cation conduction in the calcium release channel of the cardiac sarcoplasmic reticulum under physiological and pathophysiological conditions  
Andrew Tinker, Allan R G Lindsay, Alan J Williams

1826 The relative contributions of different intracellular and sarcolemmal systems to relaxation in rat ventricular myocytes  
N Negretti, S C O'Neill, D A Eisner

1831 Triggered propagated contractions in human atrial trabeculae  
Marcel C G Daniels, Teresa Kieser, Henk E D J ter Keurs

1836 Continuous measurements of cytoplasmic ATP in single cardiomyocytes during simulation of the "oxygen paradox"  
Keith C Bowers, Ashley P Allshire, Peter H Cobbold

1840 Intramitochondrial free calcium in cardiac myocytes in relation to dehydrogenase activation  
Fabio Di Lisa, Giovanni Gambassi, Harold Spurgeon, Richard G Hantsford

1845 Excitation-contraction coupling in rat heart: influence of cyclosporin A  
Hamid S Banijamali, Mark H C ter Keurs, Leendert C Paul, Henk E D J ter Keurs

Contents continued inside back cover
Characterisation and localisation of a 67 kDa calcium binding protein (p67) isolated from bovine hearts *Luming Wang, Hiroshi Iida, Yosaburo Shibata*

Fluorocarbon simulation of myocardial ischaemia and reperfusion: studies of relationships between force and intracellular calcium *Oscar H L Bing, Yasuki Kihara, Wesley W Brooks, Chester H Conrad, James P Morgan*

Alterations in cardiac myosin isozymes associated with aging and chronic hypertension: their modulation with nifedipine *Veena Raizada, Dorothy Pathak, Thomas M Blomquist, Rebecca Minser, Beulah Woodfin*

Effect of extracellular ions and modulators of calcium transport on survival of tertiary butyl hydroperoxide exposed cardiac myocytes *Gregory J Castro, Aruni Bhatnagar*
